

THE WATER TOWER

PARTNER WITH THE WATER TOWER

JOIN OUR ECOSYSTEM OF INNOVATORS

WWW.THEH2OTOWER.ORG

The Water Tower (TWT), the premier water innovation center campus located in Gwinnett County, Georgia, is a hub for technology development, research, education, and training.

The water sector is currently facing a convergence of complex challenges. One-third of the water workforce will retire in the next 10 years and with an insufficient influx of new, trained talent and tight competition there is an immediate risk of losing key institutional knowledge¹. Utility executives believe innovation is critical to addressing these challenges, however, many have limited resources to foster innovation within their organizations².

These challenges cannot be addressed alone. To address these needs, TWT seeks to forge powerful R&D collaborations, foster economic development, and equip water and wastewater utilities with the research, technology, and training needed to meet current and emerging sector challenges.

OUR VISION

Build a thriving ecosystem of innovation driven by water challenges, informed by research, and powered by people.

OUR MISSION

The Water Tower Institute 501c3

A hub for water industry solutions that fosters a thriving community and environment.

The Water Tower at Gwinnett 501c4

Provide world-class resources and infrastructure to support the Institute and the community.

OUR PROMISE

We create diverse and enriching experiences with passionate people, state-of-the-art facilities, and dynamic partnerships.

WHAT WE DO

EMPOWER THE WATER WORKFORCE

INNOVATE TOMORROW'S WATER SOLUTIONS

TAILOR OPPORTUNITIES FOR COLLABORATION

WHAT MAKES TWT DIFFERENT?

Partnering with TWT provides a unique opportunity to participate in leading-edge water innovation.

Real World Testing. TWT's demonstration area provides access to multiple sources and assets including water, wastewater, and stormwater.

Problem Solving Pioneers. We provide access to leading industry experts and resources to help design, test, and validate the latest technologies and collaborate on timely research.

Talent Pipeline. Our campus provides an active ecosystem for recruitment and training for tomorrow's workforce.

Meaningful Connections. Our events and programs provide entryways for collaboration with our extensive partner network. We facilitate meaningful connections among utilities, private companies, technology providers, universities, and other water-related organizations.

State-of-the-Art Resources. We work with our partners on R&D projects in our living lab, experimental lab, analytical lab, and microbiology lab to tackle critical challenges and fine-tune technologies. Partners may use TWT meeting space at discounted rates.

Industry Expertise. Our team has over 250 years of combined water industry expertise across multiple disciplines.

Onsite Training. TWT offers training for entry level water and wastewater operator and lab analyst positions, as well as upskilling and professional development. We partner with training providers to bring practical, pertinent training to our campus for the benefit of utilities and partners.

Visibility and Outreach. We feature our partners on our website, social media, Pipeline Blog, podcast interviews, building signage, and more to spread the word about the advancements and projects our partners are working on.

By fostering collaboration, advancing digital transformation, and bridging the gap between research and real-world application, The Water Tower is shaping a more sustainable and resilient water future -
because water isn't just a resource, it's life itself.

PARTNERSHIP LEVELS

Partnering with TWT provides a unique opportunity to participate in leading-edge water innovation.

Legacy Partner (\$100,000 annually)

Leave your mark on TWT by sponsorship of the largest conference space on campus.

- Naming rights to the Multi-Purpose room, the largest collaboration and convening space at The Water Tower, including outdoor signage, for the duration of the partnership
- Ability to construct a dedicated training area (up to 10,000sqft)
- Ability to demonstrate a technology or conduct R&D on campus (valued at \$36,000 per year)
- 50% discount on H2Co-Working Membership
- Ability to utilize TWT conference rooms, classrooms, and Multi-Purpose Room at no additional cost
- Sponsorship of anchor events at no additional cost. For the golf tournament, this includes a hole sponsorship)
- Sponsorship of specialty networking events
- Exhibitor space and four registrations for Demo Day, National Backflow Prevention Day, and Run Like Water 5K
- Access to media equipment and editing support for a 3-5 minute video or 15-30 minute podcast (5 per year)
