

## WOMEN IN WATER

COMMUNITY & CLEAN WATER

### The Why

#### What is the purpose?

- To create a modern “Women at the Well” gathering – bringing women in the water, wastewater, and stormwater sectors together to celebrate, share, and grow in as waterkeepers. Throughout history, the well was more than a source of water — it was a gathering place where women connected, shared wisdom, solved problems, and strengthened community. From quilting circles to kitchen tables to professional forums, that spirit of shared knowledge continues. This event carries that tradition forward, offering a space for women in our community to learn from one another and grow together.
- To take advantage of a dynamic educational and personal growth opportunity
- To lift up water, the women who steward it, and the communities that depend on it – sharing stories, building connections, and gaining insight from one another

#### Who should attend?

We welcome women throughout the water community - utilities, consultants, contractors, vendors and academics – who are focused on creating a stronger environment to empower themselves and support each other.

#### Who is organizing this?

This event is being organized by a committee of volunteers comprised of women in the District of Columbia, Maryland, and Virginia (DMV) Region who work in utilities and consulting, in partnership with ReSoLve – an initiative of the non-profit Water Tower ([www.resolvewater.org](http://www.resolvewater.org)).
